TUTIMA

HOMMAGE

This new minute repeater was fully conceived, designed, and manufactured in Tutima's new factory in Glashütte. Aptly named Hommage in honor of founder Dr. Ernst Kurtz and the company's return to Glashütte after 65 years, the watch is being produced in a limited edition of twenty-five pieces in 43mm rose gold and platinum cases.

The style of the manually wound Caliber 800 is classic Glashütte. The plates and bridges are matte gold-plated in the frosted finish typical of early Saxony, while the steel parts are all finely polished—including those of the in-house strike train.
