

TUTIMA
SAXON ONE CHRONOGRAPH

The highlight of a new collection made entirely in Glashütte, Germany, the stainless steel Tutima Saxon One chronograph features an eye-catching case design that combines angles with curves and polished surfaces with matte. Large chronograph pushbuttons on either side of the screw-in crown are discreetly integrated into the caseside, and twin central chronograph hands indicate elapsed minutes as well as seconds on the main dial for easy legibility. The Tutima Caliber 321, based on the Valjoux 7750, is the self-winding engine at the heart of this new model.
