

TUTIMA

THE NEW M2 Seven Seas watch from Germany's Tutima brand is a response to what Tutima says were frequent requests for a three-handed self-winding model in the M2 chronograph family. The M2 chronograph is the updated version of Tutima's NATO Chronograph, made for pilots. Tutima has created the M2 Seven Seas for sailors and divers. Its case is made of solid pearl-blasted titanium and has a diameter of 44 mm and a height of 13 mm. It features a screw-down crown, a screw-in back, and a 3-mm-thick sapphire crystal, which is nonreflective on both sides. The watch's 50 bar (500 meters) water resistance is indicated on the dial. Its calibrated bezel rotates in one direction only.

The watch is powered by Tutima's automatic Caliber T 330, which has a power reserve of 38 hours. The Seven Seas comes with either a black or deep blue dial, with either a Kevlar strap (\$2,100) or titanium bracelet (\$2,500).
