

TUTIMA

The name Glashütte is synonymous with watches in Germany. The area, known also for precision engineering, already had quite a watchmaking industry going when World War I closed off markets, followed by the hyperinflation of the early twenties. To rebuild the local economy, a conglomerate was created to produce finished watches under the leadership of jurist Dr. Ernst Kurtz, consisting of the movement manufacturer UROFA Glashütte AG and UFAG. The top watches were given the name Tutima, derived from the Latin *tutus*, meaning "whole" or "sound." Among the brand's most famous timepieces was a pilot's watch that set standards in terms of aesthetics and functionality.

A few days before World War II ended, Kurtz left Glashütte and founded Uhrenfabrik Kurtz in southern Germany. A young businessman and former employee of Kurtz by the name of Dieter Deleate is credited with keeping the manufacturing facilities and the name Tutima going even as the company sailed through troubled waters. In founding Tutima Uhrenfabrik GmbH in Ganderkesee, this young, resolute entrepreneur prepared the company's strategy for the coming decades.

Deleate has had the joy of seeing Tutima return to its old home and vertically integrated operations, meaning it is once again a genuine *manufacture*. Under renowned designer Rolf Lang, it has developed an in-house minute repeater. In 2013, Tutima proudly announced a genuine made-in-Glashütte movement (at least 50 percent must be produced in the town), Caliber 617. With characteristic restraint, the brand has placed this fine piece of engineering inside the new Patria, which comes with a subsidiary second display or a second time zone. Another recent sign-off is a modern interpretation of a classic older pilot's watch for the Grand Flieger collection. The look is fresh, the hands longer, and the functionality outstanding.
